

## How to Setup Email Outlook POP or IMAP (TLS)

This guide will show step-by-step instructions for setting up email on Outlook 2013 for Windows. While it can be used for other versions of Outlook, some screens and steps might vary.

### Adding a new account:

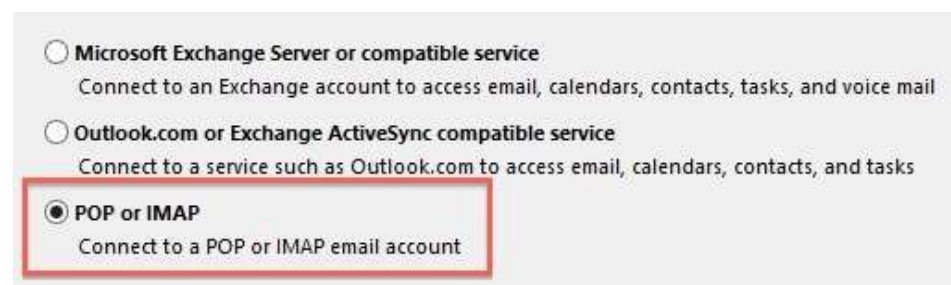

1. Select the **File** menu and choose **Info**

2. Click the **Add Account** button.
3. Choose **Manual setup or additional server types**

4. Click Next.
5. Choose **POP or IMAP** .

6. Click **Next**.

## Account Settings : POP and IMAP Account Settings.

- Enter your **Name** as you want it to appear on your outbound email messages.
- Enter your email address.
- Enter **securemail3.nineweb.co.th** as your Incoming Mail Server.

*\*You would not enter example.com but your own domain name.\**

- The **Outgoing Mail Server** is the same as your **Incoming Mail Server**.  
: **securemail3.nineweb.co.th**
- Enter your email address for the User Name.
- Enter your email password.
